NIMBUS BAY LIGHT

Product Name	NIMBUS BAY LIGHT
Wattage:	50W - 250W
CCT:	6500K
Lumen Efficacy:	100 lm/W
CRI:	80
Shape:	Round
IP:	IP66

Application / Warehouses / Industrial Sheds / Hyper/Supermarkets

LED Highbay with high efficacy and excellent thermally managed aluminium die cast housing having heat dissipating fins for larger surface area, satin finish powder coating and fitted with toughened glass in the front.

Ordering Details:

*Also available in 4000k & 3000k on request.
*Also available in 60° beam angle.

MODULAR ULTRA

Product Name	MODULAR ULTRA
Wattage:	60W - 180W
CCT:	6500K/4000K/3000K
Lumen Efficacy:	100 lm/W
CRI:	80
IP:	IP66

Application / Road Lighting / Campus Lighting / Industrial Estates / Open Parking

Modular Ultra is a highly efficient and robust luminaire, which is ideal for area lighting and facade lighting application.

MODULAR ECO

Product Name	MODULAR ECO
Wattage:	50W - 250W
CCT:	6500K/4000K/3000K
Lumen Efficacy:	110 lm/W
CRI:	80
IP:	IP65

Application / Material Handling Areas / Conveyor Belts / Power Plants / Cement Plants

Energy-saving long-life corrosion-resistant, vertical surface- mounting pressure die-cast aluminium housing and control gear compartment well glass luminaires with high-power LED as light source.

Wires

WIRES

Product Name WIRE

FR-LF (Flame Retardant Lead Free)
100% Electrolytic Copper
Superior Insulation
Anti Termite, Anti Rodent

Reach RoHS
Compliant

High Grade PVC and 100% Electrolytic Copper makes the Pharox wire a very viable and trust worthy solution for wiring our buildings.

Coolers

THUNDER

- Vertical & Horizontal louver Movement
- Aerodynamic 5 Blade Fan
- 3 Speed Controller
- Powerful & Robust Fan for Long Working Hours
- Large Front Grills for Better Air Flow

Product Name THUNDER

- Power – 190W
- Air Throw Distance 35-feet
- Noiseless Cooling
- Aerodynamic Air Delivery
- 65L / 80L / 100L
- Honey Comb Pads
- Large Ice Chamber
- 5000M3/Hr Air Delivery

Application Indoor / Outdoor / Café / Office

- Auto-Fill for Continuous Water Supply
- Large & Easy Clean Ice Chamber
- Caster Wheels for Free Rolling in All Directions
- Water Level Indicator

Average Lamp Life

Average lamp life is an average of the lives of individual lamps operated under standard conditions. LED products have extremely long lives. However, their light output diminishes over time. Pharox defines the lifetime of its LED luminaire as the operating time in which the LED luminaire produces more than 70% of their initial light output.

Infrared Radiation

Infrared radiation comprises electromagnetic waves in the spectral range between visible light and long-wave terahertz radiation. High doses of near infrared radiation in particular with a wavelength of 780 to 3000 nm penetrates deep into and under human skin and can lead to health problems.

LED

Light Emitting Diode is an electronic semiconductor component. If current flows through the diode it emits light with a wavelength that depends on the semiconductor material.

Lens

A lens is an optical component with two refractive surfaces, at least one of which is either convex or concave. In LED luminaire the function of a lens is to focus or disperse the light and therefore define the beam angle.

Lumen

Lumen is the photometric unit of luminous flux. Luminous flux is a measure of the entire visible radiation emitted by a radiation source. 'Cold lumens' is the light output of the LED chip alone when it is first switched on. 'Hot lumens' refers to the light output of the LED when it is fully warmed up in the luminaire. The hot lumen value may be 30-50% lower than the cold lumen value.

Recycling

Pharox LED products are extremely durable and do not contain any mercury. However, because they contain electronic components, they must be disposed of as waste electrical and electronic equipment at the end of their life.

Resistance to Switching Transients

LED products cannot be switched on and off indefinitely. Pharox LED products can tolerate typically around 1,00,000 switching cycles and more.

Tco (Total Cost of Ownership)

TCO includes all the costs over the entire life of a product or for a particular operating time. It covers procurement costs, replacement costs and operating costs (power). LED products now pay for themselves through their long life and low power consumption.

Thermal Output

In contrast to conventional light sources, LEDs convert a high proportion of electrical power into visible light. However, even with modern LED products, a large proportion of the energy consumed is emitted in (unwanted) heat. Nevertheless, there is enormous potential in LED technology for reducing this still further (see also Heat Sink).

UV Radiation

UV radiation is electromagnetic radiation that is invisible to the naked eye and may cause health problems. Pharox LED products do not emit any UV radiation.

Watt

Watt is the SI unit of power and is used for incandescent lamps as an indication of their light output. Since modern energy-saving lamps and LED product consume far less power to achieve the same brightness, the wattage is no longer as meaningful. The lumen value is now used instead.
